TO WHOSOEVER IT MAY CONCERN.

We are the suppliers of Elgi Air Compressors and Garage Equipments. Besides we also undertake the installation of Pneumatic Automation Pipeline work. Since last.10 years we have been using Kitec Composite Pipes for air supply lines. The ease and speed of installation with Kitec Composite pipes as compared to GI Pipes and the long term benefits to our clients weighs strongly on our minds and thus the choice of Kitec Composite Pipes gets top most priority. We are very happy with the overall performance of Kitec Pipes as we have not faced any problem with the several installations we have done.
