TO WHOM SOEVER IT MAY CONCERN

This is to certify that we have replace the G. I. Pipeline of Boiler Feed Pump Motor, which was meant for coolant system ,with **Kitec** composite pipes and fittings . We found that the installation much easier and faster due to flexibility of pipe.

Even after laps of period of more than 20 **months** we have found the water flow the same, as there is no corrosion at all in this pipe.

Hence we would highly recommend the use in water flow system to all those who are constantly on the look for better process in new and replacement cases.
Thanking you,

Your's faithfully,

Bansjal 29.03.04
