Dated 24th Sepetember 2002

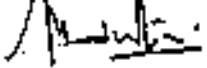

To Whomsoever It May Concern

This is to certify that we have used **KiTEC** Composite pipes & fillings at our own residential project at Kota for Hot & Cold water Plumbing & for L.P.G. supply to the kitchen. The pipeline installation was done one & a half year back and we are staying in our residence since last one year. We have not faced any problem of leakage, corrosion, scaling.

We can state that our experience with this new piping system has been outstanding. The pipeline installation work was completed much faster than the conventional piping, as these pipes can be bended by hand and available in coil lengths, therefore no of joints has been reduced by .50%.

Hence, we would highly recommend the usage of this plumbing system all over Rajasthan where corrosion & scaling are major problems.
