### To Whom It May Concern

It is certified that we have used **KiTEC Composite Pipes and Composite fittings** in the year 2003 which were supplied by M/s Carewell Pipes (represented by Mr. Santosh) in my four storeys House at B-1/183, Janakpuri in Plumbing Hot & Cold water Pipe lines.

I found the KiTEC Pipes and fittings as non-corrosive, versatile, easy to handle and install although initially I was apprehensive to use it. Now I can say that the pipe has performed well beyond my expectations.

I am happy that the company has contacted me to know the performance after such a long period.

Thanking you.
