

OFFICE OF THE CHIEF TOWN PLANNER JAMNU DEV AUTHORITY  
J A M M U

To,

The Addl. General Manager,  
Power Grid Corp. Ltd,  
Jammu

SUB : - KITEC Composite Pipes.

Sir,

Kindly refer letter No. Inp.0072 dt 17/10/2001 from Aditya Enterprises addressed to your and a copy endorsed to undersigned regarding the uses of KITEC composite pipes. These pipes are completely corrosion free. Other characteristics are like long life, Fewer joints, Stay in shape in hot & Cold , UV stabilised, resists the deposition of salt, higher and consistent flow. KITEC is easily formed into curves to radius equivalent to 5. times the dia meter of pipe. The pipe length is 100 mtrs coils. These piping system is superior to the G.I. piping.

So, I recommend the usage of this plumbing system in the Power Grid Colony. May consider the same. Literature and cost comparison between KITEC PIPE with fitting and G.I pipe (B-Grad Tata) received from KITEC is enclosed for reference.

Yours faithfully,

NO.:- JDA/CTP/468-70  
Dt.:- 10/11/2001
