To Whom It May Concern

This is to certify that we have procured KITEC Composite (PE-AL-PE) pipe and its Crimp type fittings from M/S. Unique Pipetech, Kolkata who are the authorised marketing associate of the manufacturer of M/S. KITEC Industries (India) Ltd.

KITEC pipes and fittings are procured during the period September, 2007 to April, 2008 for 211 flats and installed in 150 flats approximately at site Red Road Camp, Fort William, Kolkatta. The same was installed for concealed / internal plumbing line for Hot & Cold water.

The necessary Tools and training for the installation of KITEC Piping system were provided by Unique Pipetech to our contractors and plumbers and the representative technician have periodically visited our site to ensure the installation being carried out as per Company's guidelines.

Unique Pipetech has also at random selected and hydraulically tested the installed pipe and fittings and has insisted our contractor / plumbers for the hydraulic pressure testing after the installation which they are following.

We are very much satisfied with the quality of KITEC Composite (PE-ALPE) Pipes and its fittings and have found them to be easy and convenient to install, minimizes number of fittings/joints, are not likely to corrode or rust like conventional GI pipes and are 100% leak proof due to the compression type Crimp fittings.

We are extremely satisfied also from the services provided by Unique Pipetech in respect to timely supply and guidance for the installation of KITECH pipes and its fittings.

Thanking You,

Yours Truly,
 Fort Coast Constructions and & Industries Limited.,
