**To Whom So Ever It May Concern**

**Sub : " KiTEC " Composite Pipe.**

This has a reference to the above mentioned, and I would like to inform that the Product "**Kitec**" Composite Pipes with Composite or Brass Compression fittings for Hot and Cold Water Supply System, which I have satisfactorily used since last **Nine Years** in my various prestigeouse projects as in capacity of Consultant as well as Contractor and would proudly state that, "*Thanks to the revolutionary change the product has made in the plumbing field as against the conventional material available in market*".

The piping system so far I have installed is working in perfect conditions with its technical and is most user friendly nature as far as it's salient features like easy to install and repair, and also most economical and hassle free as compared to the other Metal and Plastic piping systems for available for today's demand of modern plumbing systems for the Hot and Cold water Supply.
