CERTIFICATE

This is to certify that we have recommended and used kitec composite pipes and fittings at apartment project at Banson town.

These pipes are subject to below mentioned parameters:

- | | | | |
|----|--------------------------|---|------------------|
| a) | Type of water | - | Ozontated water. |
| b) | AV operating temperature | - | 60° C |
| c) | AV operating pressure | - | 3.0 kg / sq.cm |

Kitec piping system were specially chisen over all other piping system as it was found that kitec was suitable for usage of ozonated water for plumbing system and the entire system has been performing well up to date. No expansion / contraction of hot water pipes and the piping installation has been executed with regular type of wall chasing and finish.

The loss of pressure is vary trivial as pipes are smoothly bent to the required profile.

As the pipes are available in rolls, fitting is minimised and easy to install. With less labour and can be loaded immediately after the installation.

We recommended this piping to all our further projects also.
