TO WHOMSOEVER IT MAY CONCERN

This is to certify that we have replaced the existing entire pipe line of G.I, in two wings of of our society by Kitec - Composite pipes and fittings. The existing G.I. pipe line was of 1" dia which corroded within a short period and therefore the waterflow was considerably low. In this place, Kitec - composite pipe- was used of 3/4" dia. The installation of this pipe line was very fast and after pressure test it was found that the water flow is comparatively much more as compared to G.I. pipe line of 1" dia.

We heve been very much satisfied with the excellent performance of Kitec Composite pipe and strongly recommend the same for use in new projects as well as for replacement purpose in view of its superiority in many respects.

For SWAGAT co-op. hsg.society ltd.,
