TO WHOM IT MAY CONCERN

We are using KiTEC Composite Pipes and its fittings for "Dust Suppression system" in the mines area of Jharkhand, M.P., Chhattisgarh and Orissa since 2003. KiTEC Pipes are used under operating pressure of 6 to 10 Kg/Sq.cm and are installed exposed to sunlight conditions.

We have also installed KiTEC Pipes and its fittings for Hot and cold water plumbing line and for Solar water heating system in the year 2004 at the Bungalow of our Director at EM Bye pass road, Kolkata.

We have found KiTEC Piping system is very suitable in all respect in the above applications and we are continuously procuring the same every year for our valued clients of mining industries.

We wish to put on records that after use for more than 10 year, we have not faced any single problem with KiTEC Pipes, its fittings and with its jointing system.

We are extremely satisfied with the performance of KiTEC Piping system and also with the services of their marketing associate M/s. Unique Pipetech, Kolkata.

Thanking you,

Yours truly,

For Hallmark Aquaequipment Pvt Ltd.
