TO WHOM SO EVER IT MAY CONCERN

This is to certify that we have been installing *Kitec Composite Pipes & Fittings* for Hot Water Piping of the solar "Water Heating Systems" that we supply & install.

Because of the availability of Kitec Pipes in form of 50 ints coils and it being malleable in nature, the installation is simple, convenient and fast. It does not corrode like GI pipes and because of the smooth inside surface & chemically inertness, scale formation is not promoted.

We hereby confirm that we are fully satisfied with Kitech piping system and strongly recommend as best alternative to GI pipes specifically for hot water & water with high iron content.

For Jolly Enterprise, Ranchi
