

**TO WHOM SO EVER IT MAY CONCERN**

1. This is to certify that M/s KITEC INDUSTRIES (INDIA) Ltd. Mumbai has supplied & installed KITEC composite pipes of 3240mm, 2532mm approx 4500 Mtrs for our water supply project in North Eastern region. The site is at an altitude of 14200 feet above the sea level and the operating pressure in the pipe line is about 15.0 Kg/cm<sup>2</sup>.

2. We are extremely satisfied with the services of the company and the quality of KITEC Pipes. These pipes are very convenient to install in the rocky uneven terrain due to their flexibility & pipe length in 100 Mtrs coils.

A handwritten signature in black ink, appearing to read 'BNN Rao', with a horizontal line underneath it.
