Kawala Naka, KOLHAPUR - 416 003.

Dear Sir,

We are very much thankful for your co-operation extended for supply & proving of Kitec components for our water circulation pipe lines.

As you know the products on which these fittings are being used are sophisticated and used in Printing Industry.

The product offered by you is very interested and we liked the below mentioned features.

1. Flexible tubing concept avoiding number of pipe fittings.
2. Coating on the inside and outside surface of the pipe improves aesthetic as well as reduce co-efficient of friction.
3. Easy fitment of joints without threading on the pipe.
4. No leakages from the joints.

Thanking you,

Yours faithfully,
For Manugraph Industries Ltd.
Unit No.2, Kodoli.

P. G. DONGALE
(Deputy Manager, Design)
