Ana Sagar Lake Tapu, AJMER - 305 001

Date: 3rd February, 2000

TO WHOMSOEVER IT MAY CONCERN

This is to certify that we have used KiTEC pipes and fittings at our project The Island Restaurant for water supply service line located at Ana Sagar Lake Tapu, Ajmer-305 001. The Pipeline installation was done One & a half year back and till today, we have not faced any problem.

We can state that our experience with this new piping system has been out-standing, as on this project we have used a single length of 600 meters pipe. The whole pipeline was laid with in two hours by using sinkers. We would like too maintaining here that if we had used the conventional piping system for this project, the project would have been completed not less that six months time and the chances of piping get corroded very fast. At the same time project cost get reduced substantially.

Hence, we would highly recommend the usage of this plumbing system to all those who are constantly on the look for better processes and materials for the building construction.

For The IsLand Restaurant
